Is eLearning app is being as effective as traditional classroom lectures for theoretical lectures ?
## Research Project

Instructor- Prof. Dr. Mohammad Yass   Presented by- Vikas Sharma

7/23/2019

Agenda

- Research Overview
- Functionality
- Wireframes and Final Prototype
- Future Scope

Research Overview

- By 2019, there will be 2.5 billion smartphone users (According to Statista)

- eLearning apps can be the future of learning method

- To evalute the effectivness of eLearning app, I choose some topics from International Project Managment for my prototype
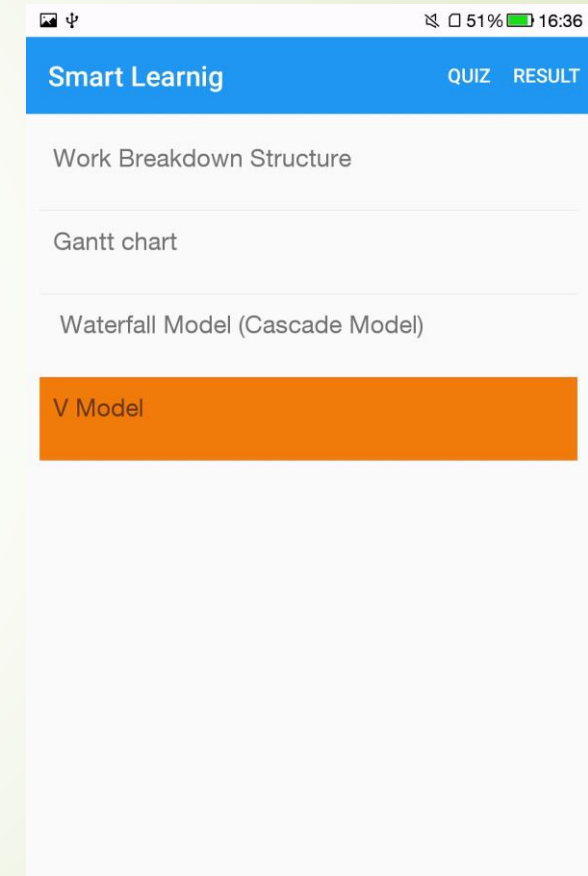

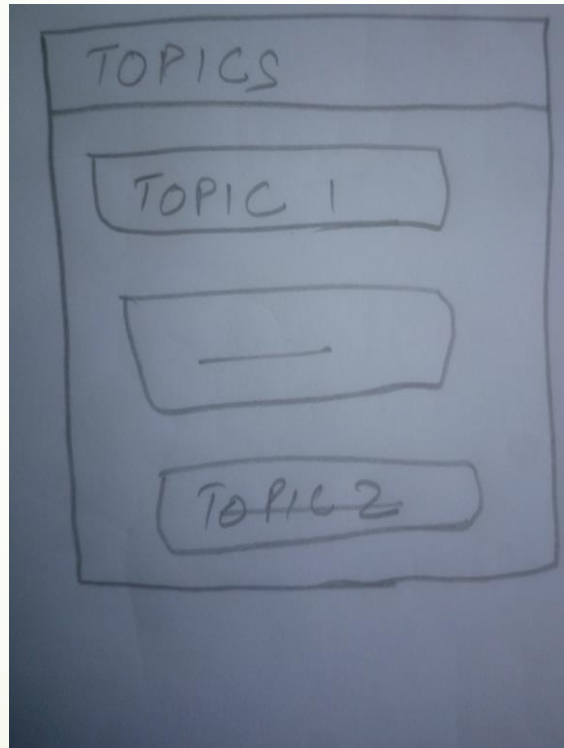

Functionality

- ▰ User can read any topic from the list of topics

- ▰ User can control the learning process with the help of quiz

- ▰ Only those questions will be asked which are marked as LEARNED
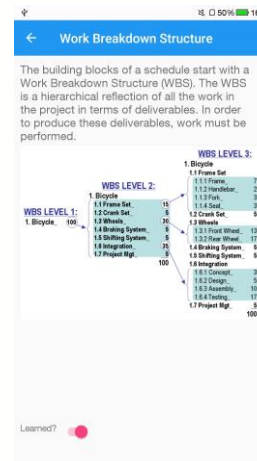

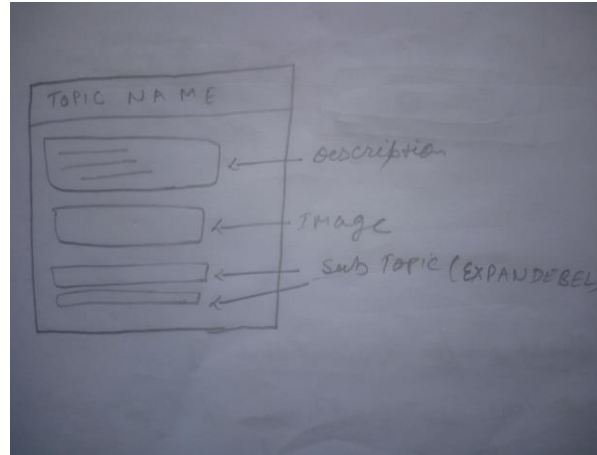

Wireframes and Prototype

■ List of Topics

Wireframes and prototype

- Topic details
  - Insted of Expandable subtopics, use the same page for subtopics
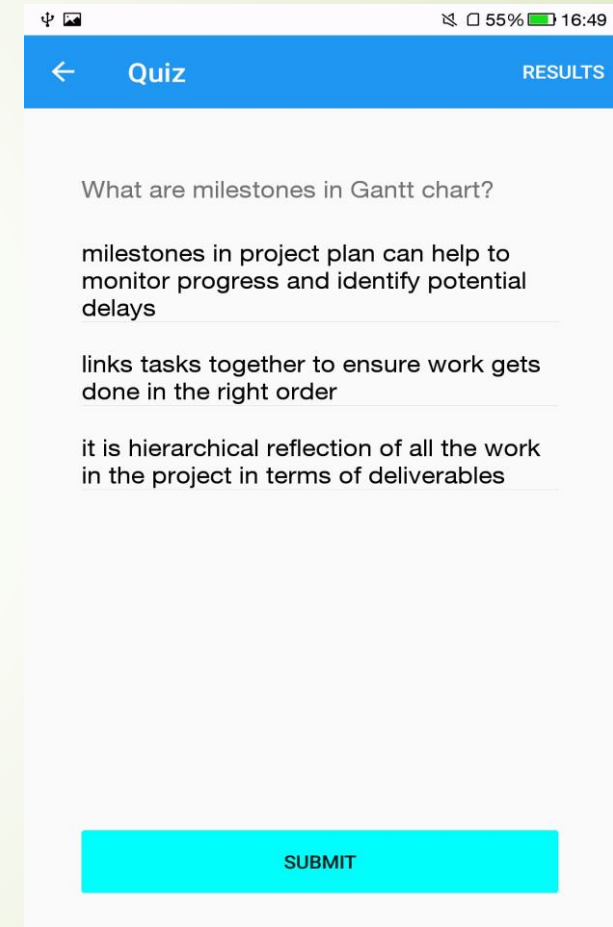

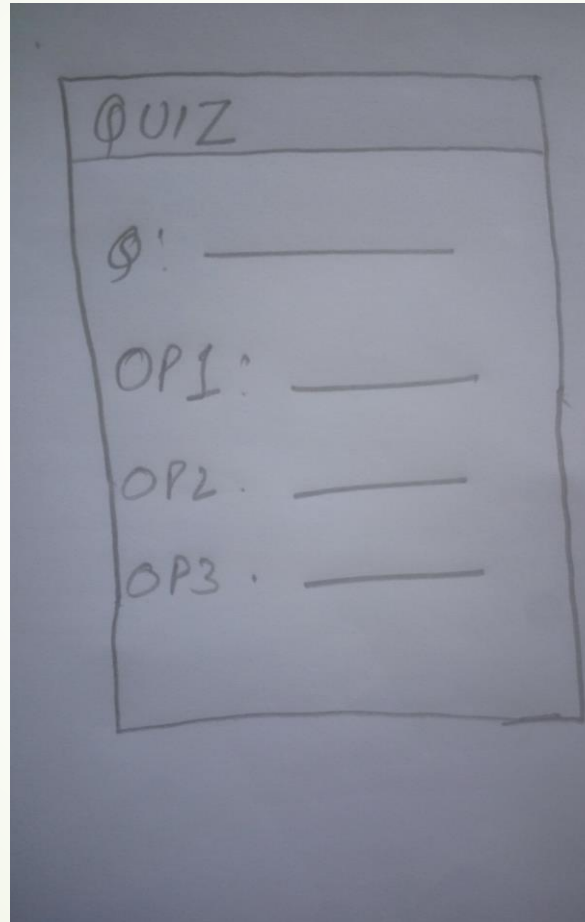

Wireframes and prototype

- Quiz
  - Add Multiple choice

Future Scope

- UI and data structure enhancment for lengthy topics
- Text to Speech

Thank you
